

Why We Exist

According to CDC data, more than 130 people die of an opioid overdose every day. We have the power to influence the health and well-being of others. We are working to make a difference by helping our communities become more aware of the signs of addiction and providing resources for help.

Our Mission and Vision

We are a diverse group of community members and agency representatives who share an interest in advocating and promoting mental health and substance abuse safety by bringing awareness, education, and prevention regarding opioid use and addiction to the community.

We are working together to improve awareness of addiction and promote safety in the home and community.

We strive to decrease the number of families affected by opioid overdose and deaths by providing education on use and misuse.
